

Home Inspections

Please review the supporting documents for additional information:

Fires kill more Americans each year than all other natural disasters combined. Your home should be a safe haven, but do you regularly check for fire hazards? If not, there is a potential for danger.

Home Inspection Checklist

- Fire extinguishers should be kept handy in the kitchen and garage
- Install at least one smoke detector on each level of your house and outside each bedroom
- Make sure you replace the batteries every six months
- Use daylight savings time as a reminder to change your batteries when you change the time on your clock
