

# Annual Drinking Water Quality Reports

The Consumer Confidence Report (CCR) is a document that provides consumers with information about the quality of drinking water in an easy-to-read format. The CCR summarizes information that is collected to comply with Federal Environmental Protection Agency and the State of Texas Commission on Environmental Quality regulations. It includes information about the source(s) of water used (i.e., rivers, lakes, reservoirs or aquifers); chemical contaminants; bacteriological contaminants; compliance with drinking water rules; educational health information; water system contact information; and public participation opportunities. TCEQ requirements for the CCR can be found in 30 Texas Administrative Code (TAC) Chapter 290 Subchapter H: Consumer Confidence Reports.

The TCEQ requires every community public water system (PWS) to provide a CCR to its customers by July 1 of every year, 30 TAC §290.271(a), which includes information from the previous calendar year. This report is also known as an Annual Water Quality Report or Drinking Water Quality Report. Below are links to the city of Crowley Annual Drinking Water Quality Reports.
