## Residential Sprinkler System Evaluation Program

The City of Crowley, in cooperation with the [Tarrant Regional Water District](#) (TRWD), is proud to offer a free sprinkler system evaluation program for our residential customers

The free evaluation will provide homeowners with basic knowledge of how their sprinkler systems work, feedback on the current condition of equipment and recommendations for improvement. When an appointment is scheduled, a licensed irrigator will perform a 45-minute assessment with the resident.

A summary of results and recommendations will then be provided. This program is not a sales pitch for additional contracting services, and you will be under no pressure to make specific changes. We hope this opportunity will assist Crowley residents to efficiently manage outdoor water use.

Please follow [this link](#) to request a free sprinkler system evaluation.
